SECURITY FEATURES - All Certificates of Origin contain the following security features per AAMVA requirements:

1. Paper

(a) Sensitized Security Paper— paper that is reactive to chemicals commonly used to alter documents.

(b) Non-Optical Brightener Paper— paper without added optical brighteners which will not fluoresce under ultraviolet light.

2. Engraved Border— a border produced from engraved art work which shall appear on the front of the document.

3. (a) Prismatic— rainbow printing which is used as a deterrent to color copying, and/or

(b) Copy Void Pantograph - the word “void” appears when the document is copied.

4. Complex Colors— colors which are developed by using a mixture of two or more of the primary colors (red, yellow or blue) and black if required.

5. Erasable Fluorescent Background Inks— fluoresces under ultraviolet light and reacts to any attempt to erase in such a manner as to be immediately detectable.

6. Background Security Design— a repetitious design consisting of a pattern which hinders counterfeiting efforts.

7. Microline— a line of small alpha characters in capitol letters which requires a magnifying glass to read.

8. Consecutively Numbered— documents that contain a number which is consecutively numbered for control purposes.

9. Security Thread— with watermark

LAYOUT — Text matter space for 1/10 inch horizontal and 1/6 inch deep characters per AAMVA H-12 Policy for standard format
