

VIN-EZE 6.0

DEMONSTRATION INSTRUCTIONS

THE DEMO VERSION USES FICTITIOUS SAE CODES. WHEN ORDERING VIN-EZE, YOUR SAE CODE WILL BE USED.

Installing the Demo... To install and run the demo, you need the following minimum requirements: Microsoft® Windows® 95c or greater, cd-rom drive, hard drive with at least 5MB of free space, and a mouse. Insert the cd into your cd-rom drive, the auto installation process should begin. If not please run the "setup.exe" manually from the cd. Once the program is installed a "Vin-eze" icon will appear on your desktop. Double-click the **VIN-EZE** icon to begin the program. The Main Menu will appear, you're ready to start!

Using the Demo... The "Notes" button contains information about the program and can be accessed from any layout. Remember to use either the "tab" key, on your keyboard, or mouse pointer when moving between fields.

1. Click on the "V" icon entitled "**Manufacturer's Information**". This database contains information in regards to the manufacturer (your company information). From here you can set the Mfg Year, Mso/Mco Year, Make field for Mso and reset the sequential numbering (last 3 or 6 digits of your vin). The demo is currently configured for 6 digit sequential numbering. The information here will be used in different parts of the program.
2. Click on the "V" icon entitled "**Dealer/Customer Information**". This database contains information on your customers. Here you can create new records or modify existing customer information. When you have entered this information, it will then be used in different parts of the program.
3. Click on the "V" icon entitled "**Model Information**". This database contains information on your individual models. Fields included are Series #, 5-Digit Model, Gvwr, Gawr, Tire, Rim, etc... The "Series #" field should be considered as a unique part number and not duplicated. It should represent each individual model you have. This information will be used in the Data Entry portion of the program.
4. Click on the "V" icon entitled "**Data Entry**". This database is used for creating/printing Vin's, Mso's and generating report information.
 - View existing record** - Click on the rolodex card, located in the upper left hand corner, to scroll through existing records.
 - Modify a record** - After selecting a record, click or tab on any field to modify the information. To change an existing Vin, select the "Clear Series" button and reselect another series.
 - Create a new record** - Click on the Create New Vin button, located in the left hand column, to create a new blank record. Select a Series and a new vin will be created.
 - Modify an MSO** - Select a record and click on the "Mso" button. Click or tab on the fields to modify or add information. Click on the "Return" button to return to the DATA ENTRY screen.
5. Click on the "Main Menu" button to return to the MAIN MENU.

It Couldn't Be Easier... If you would like to order the program please fill in the order form provided with the demo package. Our fax number is listed below. Approximate delivery time is between 3-5 days. We will contact you prior to shipping for payment.
