**SECURITY FEATURES** - All Certificates of Origin contain the following security features per AAMVA requirements:

**1. Paper**

(a) Sensitized Security Paper— paper that is reactive to chemicals commonly used to alter documents.

(b) Non-Optical Brightener Paper— paper without added optical brighteners which will not fluoresce under ultraviolet light.

**2. Engraved Border**— a border produced from engraved art work which shall appear on the front of the document.

**3. (a) Prismatic**— rainbow printing which is used as a deterrent to color copying, and/or

**(b) Copy Void Pantograph** - the word “void” appears when the document is copied.

**4. Complex Colors**— colors which are developed by using a mixture of two or more of the primary colors (red, yellow or blue) and black if required.

**5. Erasable Fluorescent Background Inks**— fluoresces under ultraviolet light and reacts to any attempt to erase in such a manner as to be immediately detectable.

**6. Background Security Design**— a repetitious design consisting of a pattern which hinders counterfeiting efforts.

**7. Microline**— a line of small alpha characters in capitol letters which requires a magnifying glass to read.

**8. Consecutively Numbered**— documents that contain a number which is consecutively numbered for control purposes.

**9. Security Thread** — with watermark

**LAYOUT** — Text matter space for 1/10 inch horizontal and 1/6 inch deep characters per AAMVA H-12 Policy for standard format
